

Appendix B: Lists of Selected Readings

Introduction to Appendix B

Appendix B contains selected lists of readings from the full collation of the Gospel of John. These lists are intended to give the reader access to as much of the original data used for this thesis as possible; and to allow readers to check for accuracy many of the figures given in the thesis. The lists may also be of use to readers who wish to use the data for their own purposes. The lists are included as separate PDF files on a CD Rom insert. The title of each list is preceded by a numerical reference indicating which section of the thesis the list is most relevant to. The contents of the appendix are given below.
